Stainless Steel Inner-Ring for ASFA L 9mm Hose Clamps

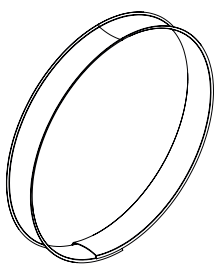

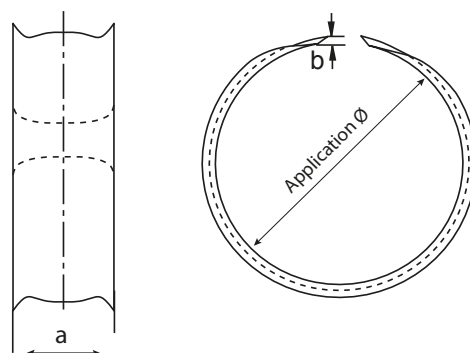

W4

This inner-ring for the ASFA L worm-drive clip with 9mm bandwidth was designed to give extra protection to the hose, especially where it comes into contact with the underside of the clamp housing.

Inner-rings are particularly recommended for use with silicone hoses which are quite fragile and can be cut easily. The inner-ring ensures a good fit, prevents damage to the hose and also contributes to an even distribution of pressure around the hose.
